**Turf-Tec International
Company History**

Turf-Tec International was started by the late Tom Mascaro in 1976 to manufacture tools to benefit Golf Course Superintendents and Sports Turf Managers in their everyday maintenance. John Mascaro, Tom's son, now heads Turf-Tec, and is carrying on the family tradition of introducing innovative tools to aid the Superintendent, Sports Turf Manager and the Professional Engineer.

Tom was best known for his invention of the Aerifier in 1946 and the Verti-Cut in 1955 along with over 100 other turf related inventions. With his insight we have developed a line of diagnostic instruments for turf that until now were only available to researchers at universities. These instruments are simple to use yet give meaningful results.

John is also known for his monthly articles called "John Mascaro's Photo Quiz" that appears in Golf Course Management Magazine and SportsTurf Magazine.

Turf-Tec International is committed to developing new products and new techniques to keep turf and soil healthy, based upon time-proven methods of finding causes of problems rather than treating symptoms.

Our products are the highest quality and fully warranted. We look forward to your business.
